web.support@ifmsa.cz

17. Listopadu 638/26, 70800 Ostrava, Czech Republic

SKILLS

- PHP (mysqli, prepared statements)
- MySQL
- Google Apps Script
- Web Crypto API
- REST API integration
- Payment gateway integration
- Role-based access control
- Input validation & sanitization

EDUCATION

2023-NOW
UNIVERSITY OF OSTRAVA

- General Medicine

2018-2022
BISKUPSKÉ GYMNÁZIUM BRNO

- Grammar School targetted on general education

LANGUAGES

- Czech (Native)
- English (Fluent)
- Spanish (Fluent)
- Italian (Intermediate)
- French (Intermediate)

PROFILE

Medical student and full-stack developer with hands-on experience building secure, data-driven web applications for medical student organizations. Experienced in PHP (mysqli prepared statements), MySQL database design, frontend development (HTML/CSS/JavaScript), workflow automation using Google Apps Script, and secure user-input handling. Currently developing a production-level e-commerce system integrating payment processing and transactional email workflows. I combine medical domain awareness with strong security-first development practices and pragmatic problem-solving.

TECHNICAL SKILLS

Backend & Security

- PHP (mysqli – prepared statements, bind_param)
- MySQL (relational schema design, normalized data structures)
- Server-side validation & defensive programming, role-based access control logic
- Secure payment gateway integration

Frontend Development

- HTML5 (semantic markup)
- CSS3 (responsive layouts)
- Modern JavaScript (ES6+)
- Structured form validation & user input handling

Automation & Integration

- Google Apps Script (invoice generation, automated email workflows)
- Spreadsheet-based financial tracking systems
- REST API integration
- CSV export and structured data transformation

RELEVANT DEVELOPMENT EXPERIENCE

Full-Stack Developer – EuRegMe Merchandise E-Shop (*In Development*)

- Designed and implemented full-stack e-commerce system with custom PHP API and MySQL backend
- Integrated secure payment processing and transactional order workflow
- Implemented prepared statements (mysqli prepare + bind_param) for injection-safe queries
- Built automated order confirmation email system
- Developed role-separated user/admin interfaces
- Applied structured input validation and protection against abuse patterns

Web & Workflow Automation Developer – IFMSA-related Projects

- Developed structured event websites (HTML/CSS/JS)
- Built invoice generation systems using Google Sheets + Apps Script
- Automated financial data synchronization workflows
- Implemented structured email dispatch and confirmation systems
- Applied validation logic to prevent data inconsistencies

PROFESSIONAL TECHNICAL TRAINING

- OpenAI Academy – Advanced Features for Nonprofits: ChatGPT's Next-Level Tools (2025)
- Google Skills – Using Gemini Throughout the Software Development Lifecycle (In Progress)
- LABA – Brand Strategy & Identity Building
